PROJECT DESIGN

Group Roles

Each group assigns:

- **Project Manager:** Organizes the team and leads the meeting.
- **AI Concept Designer** Explains the idea and how the AI tool will work
- **Technical Explainer** Describes the system in simple technical terms.
- **Ethics & Bias Advisor** Identifies risks and suggests how to reduce bias.
- **Communication & Marketing Presenter** Prepares and "sells" the project.

Language support

- Our project is going to improve…
- This tool will reduce…
- It is going to solve…
- In the future, it will help…
- One possible risk is…
- To reduce bias, we will…

Project Development Template

Project Name:
Problem Description:
AI Solution:
How It Works (simple explanation):
Target Users:
Benefits:
Possible Risks or Bias:
How to Reduce Bias:

Ethical Analysis

Each group must answer:

1. Could this AI system be unfair?
2. Who could be negatively affected?
3. How can we reduce bias?

Use AI as a Tool

Groups may use AI to:

- Improve project description
- Check grammar
- Create a slogan
- Simulate customer questions

Note: you should include in the “References” when (in which parts of the project) it was used, and for what purpose (see examples above).

Example Project

Project Name: TechAssist AI

Problem: Students wait too long for IT support.

Solution: AI chatbot for technical issues.

Plan:
We are going to implement the chatbot next semester.

Prediction:
It will reduce response time by 50%.

Risk:
It may not understand all student problems.

Solution:
We will monitor the system and update the database regularly.
